SUMMARY

Data Analyst skilled in SQL, Python (Pandas, NumPy, Matplotlib), Power BI, and Tableau. Experienced in EDA, statistical analysis, and applying machine learning models to uncover insights from real-world data. Adept at creating dashboards and reports to support data-driven decision-making.

TECHNICAL SKILLS

- Python (Numpy, Pandas, Matplotlib, Seaborn)
 - SQL
 - Power BI, Tableau, Excel
 - Data Cleaning, EDA
 - Statistics, Machine Learning

SOFT SKILLS

- Analytical Thinking
 - Time Management
 - Quick Learner
 - Data Storytelling

Data Scientist

EDUCATION

- FullStack DataScience Course
(ongoing)
Naresh IT, Hyderabad
 - B.Tech in Computer Science and
Engineering
Dr.Babasaheb Ambedkar Technological
University,Lonere
(Sep 2022 - Oct2026)
 - Higher Secondary Education
JES College Jalna,India
(Jun 2021 - Feb 2022)
 - Secondary Education
Navyuvak Ganesh Pre-Secondary School
(Jun 2019 - Mar 2020)

PROJECTS

- **Uber Data Analysis using EDA**
 - Performed exploratory data analysis on Uber ride data to identify trends.
 - Visualized ride patterns, peak hours, and user behaviour insights.
 - **USA House Price Prediction using Machine Learning**
 - Built and evaluate predictive models to estimate U.S. house prices using real estate features.
 - Performed data cleaning, feature engineering, and model training using 13 models.
 - Implemented hyperparameter tuning and model evaluation using RMSE, MAE, and R² metrics.

Your paragraph has been visualized insights and deployed a prototype using Flask.

STRENGTH

- EDA(Exploratory Data Analysis)
 - SQL
 - Statistics
